# ENGLEWOOD SHELL CLUB

## THE SHELL SCOOP – SHELL SEEKERS

### OCTOBER 2020

**CLUB WEBSITE:** [www.Englewoodshell.club](http://www.Englewoodshell.club)

Co-Presidents: Meredith Blain & Martha Dehne

Hello Shell Seekers!

October is finally here. We are cautiously awaiting the return of our snowbirds. Yes, things will be different, but the Board of Directors and the Team Leaders have been busy brainstorming ideas to keep our Shell Club Members active, entertained, and safe. For starters, we are upping our fundraising efforts. Look for auction items at events, and ads in the newsletter. This year, we will be offering ESC stickers for purchase. I personally love them on my shell buckets. Don't forget that there will be a Zoom practice class before the official general meeting. Have a Shell handy for our group Show and Shell. You don't want to miss the slideshow of photos from the 2019-2020 Shell Year. Freeman and I have been working on a fun and free You Tube project. ESC will have its own official channel! This will be another platform to view the presentations during the general meeting. The presentations and any Special Shell Interviews will be kept private for Englewood Shell Club Members and a link will be emailed to you. A few of the excursion videos will be chosen to be viewed by the public. Do you have any videos that you want to contribute to the You Tube Channel? Let me know if you do! Last but not least, a Big Thank You to Everyone who has renewed their Membership!

Sincerely,  
Co-President Meredith Blain

## Unique Shells with the Re-nourishment

Story and photo submitted by Anita Wilson

There were some very unusual shells coming ashore with the beach re-nourishment this summer. Some of them we would have trouble classifying via the Compendium. For example, Anita Wilson found a 0.50 caliber machine gun SHELL casing. As she researched the markings on the base (43 SL), she found it was manufactured in St. Louis in 1943! It has been out there in the bay ever since and still looks pristine. Most of us were aware of the WWII training bases in Venice and Punta Gorda. Anita remembers the story of how the guys stationed in Venice were sent on hikes down to the old gray barn in Englewood (finally torn down this year). There they met the girls of Englewood; several romances flourished! It ends up there was also a training base in Sarasota. All three bases handled groups of about 1100 men at a time; of those, about 200 were pilots. They all did target practice over the gulf and they were instructed to use every shell in the round, so there would not be any live ammunition left out there. The first men arrived in November of 1943; groups trained here until the war ended. This shell, which is four inches long, is the biggest treasure Anita found from the re-nourishment. Both she and Linda Powers found giant bittersweet clam

## Excellent Books!

Librarian Candy Niziol recommends these four books that take place in Florida:  
John Grisham's (two books) *Camino Winds* and *Camino Island*  
Rochelle Weinstein's *This Is Not How it Ends*  
Jennifer L. Schiff's *A Shell of a Problem*

P.S. Be sure to check out the club's website for a current listing of our library books.

## MEMBER OF THE MONTH: LESLIE MOHR

What is your favorite shell? Alphabet cone

What is your favorite find? Spiny oyster shell found on Don Pedro Beach. Also found that day were a Lion's paw and some nice Banded tulips.

What is your favorite beach? Boca Grande by the Lighthouse

What is your most unusual find? It is the size of a dollar coin, but oval shaped with a sort of stamped floral pattern.

We were unable to find any information on it until months later while browsing in the Mote Marine bookstore. To our great surprise, our strange find was an approximately 2.5 million year old Glyptodont fossil.

Fun Fact about You: While in college, I worked at the Wisconsin State Fair as an ankle grabber in the Haunted House.

How long have you been a member of ESC? Two years

Leslie was born, raised, and lived in Wisconsin until 2014 when she and her husband, Tom, retired to Englewood. After graduating with a BA in Economics and Business from The University of Wisconsin Eau Claire, Leslie had a lovely long career working in the electric and gas industry. Leslie and Tom have been married for 38 years and have one son and one daughter. They return to Wisconsin each summer to visit their children and rock hunt for agates in the regions of Lake Superior and Lake Michigan.

*Thank you to the following ESC members for their generous gifts*

*Family of Audrey Grant—shell collection*

*Anonymous—monetary donation*

## DID YOU KNOW?

In nature, male Seahorses are those who carry the female's eggs for about one and a half months in a tail pouch until they are born. This speaks of an amazing partnership between the males and females of the species, which are said to mate for life.

Board Meetings are the first Tuesday of the month. Start time is 10 a.m. If you would like a Zoom invitation, contact Co-President Meredith Blain.

**A BIG Thanks** to Meredith Blain and our Webmaster, Freeman Crosby, for creating an amazing ESC channel on YouTube!
